Workplace Safety Drug & Alcohol Testing Services

Information for Employers :

Aspiring Medical Centre can help you with workplace safety and compliance through the provision of "On Site" and "Send Away" urine drug testing and also alcohol testing.

The term "On Site" refers to the fact that the test kits used provide immediate results (well, not instant, but within 5 minutes!). An information sheet about "On Site" or "immediate result" testing is attached.

"Send Away" tests are sent to an accredited laboratory. These results are strictly controlled and able to withstand legal challenge.

We have nurses who are qualified to conduct both types of test in accordance with the NZ standard – AS/NZS 4308:2008.

What you need to know :

- √ It's reliable – the tests have a 99% specificity and sensitivity rate
- √ One-off tests or multiple - we can test individual employees or groups of employees
- √ We can offer flexibility about the testing location – if the staff to be tested come to the practice, this is the cheapest option for you. However, if you are out of town or if you have a group of employees to be tested we will come to your workplace by prior arrangement . (*Additional charges apply)

Charges :

- "On Site" Test \$80 per person, with discounts for groups of 3 or more employees. (*Travel charges may apply if we come to you.)
- "Send Away" Tests \$45 for sample collection. In addition the lab will bill their testing fee direct to the employer. At present this is \$63.05.
- Alcohol tests \$20 per person

If you would like more information, or rates for a group of employees, or rates for testing at your location please contact either

Lynda Davis Clinical Manager lynda@aspiringmedical.co.nz ph 443 0725
